

Education

LJ University | Ahmedabad
Bachelor of Engineering in Computer Science | 2023-2027

- SPI : 9.72

Experience

AI & Full-Stack Engineer | Ray Secure Innovation, Ahmedabad, India
Dec 2025 – Present

- Built an MCP server integrated into Cursor that executes diagnostic commands on network devices to verify expected configuration rules, replacing manual rule-by-rule checks during development, gated behind explicit permission before any command execution.
- Developed an AI-powered log analysis assistant that reads connectivity logs shipped by Fluent Bit and queried from OpenObserve, identifying probable root causes and fixes for client connectivity issues to reduce manual log-digging during support investigations.
- Co-developed an internal RAG-based support chatbot using the OpenAI SDK and vector retrieval, enabling accurate responses from company knowledge and reducing support workload.
- Built an admin-facing HSIA debugging utility using Go and Next.js, enabling support teams to diagnose per-user connectivity issues, including internet access failures and bandwidth degradation, reducing manual troubleshooting time.
- Developed a bandwidth fallback mechanism that automatically downgraded expired users to a low-speed profile, maintaining connectivity while enforcing subscription and data plan limits.
- Built a Happy Hours feature enabling scheduled unlimited internet access at configurable bandwidths for predefined time periods.

Technologies: Go, Gorilla Mux, Next.js, REST APIs, PostgreSQL, RADIUS, OpenAI SDK, MCP, Fluent Bit, OpenObserve, Docker, Git

Projects

VestureAI – AI Fashion Platform | [GitHub](#)
Tech Stack: ReactJs, ExpressJs, NodeJS, MongoDB, Fastapi

- Built a full-stack MERN e-commerce platform with user and seller dashboards, order management, and review system.
- Integrated a FastAPI microservice for AI-powered virtual try-on, enabling users to preview outfits on their own photos.
- Implemented personalized outfit recommendations using wardrobe uploads, user preferences, and AI models to boost engagement.

Agentic Content Generation Platform | [GitHub](#)
Tech Stack: Python, LangGraph, OpenAI, Tavily, Gemini

- Built an agentic blog writing pipeline using LangGraph, routing topics through closed-book, hybrid, or web-researched flows based on complexity
- Implemented parallel section generation using LangGraph workers, with multi-model integration (OpenAI, Tavily, Gemini) for research, writing, and AI image generation

Video Insight – Chat with YouTube Videos | [GitHub](#)
Tech Stack: Python, FastAPI, Next.js, LangGraph, Pinecone, OpenAI, SQLite

- Built a full-stack RAG chatbot that lets users chat with any YouTube video, ingesting transcripts into a shared, per-video knowledge base so repeated videos are never reprocessed.
- Designed a LangGraph-based conversation pipeline with thread-scoped memory, letting users run multiple independent chat threads across different videos with persistent history.
- Implemented JWT authentication and a multi-user architecture, isolating each user's conversations while keeping the underlying video knowledge base shared and reusable across all users.

MarketPulse Stock Picker | [GitHub](#)
Tech Stack: Python, CrewAI, OpenAI, SerperDev, Pushover

- Built a multi-agent CrewAI pipeline where autonomous agents collaboratively discover trending companies in a target sector, conduct financial research, and select the strongest investment candidate with a documented rationale.
- Integrated SerperDev for real-time web search to ground agent research and the Pushover API to deliver automated push notifications with the final investment recommendation.

Skills

- Programming Languages:** Python, Java, JavaScript, Go
- Frontend:** HTML, CSS, React.js, Next.js
- Backend Frameworks & Runtimes:** FastAPI, Gorilla Mux, Node.js
- Databases:** MongoDB, SQL, PostgreSQL, Redis, Pinecone, FAISS
- Tools & Platforms:** Docker, Git, Postman, VS Code
- AI & Agents:** OpenAI SDK, LangChain, LangGraph, LangSmith, RAG, Tavily, CrewAI, Model Context Protocol(MCP)

Achievements & Activities

- Project Exhibitor, LJiet Innovation Village: Selected to showcase a project at a university wide exhibition, presenting its technical architecture and potential applications to industry experts, investors, and faculty.
- Hackathon Participant, HackNuthon (Nirma University): Collaborated in a high-pressure, time bound environment to develop a functional prototype, demonstrating rapid problem-solving and teamwork skills.
